

About Strategic Innovative Solutions, LLC (SIS) and Strategic Innovative Solutions Africa, LTD (SIS Africa)

Established in 2009, Strategic Innovative Solutions, LLC (SIS) is a Small Business Administration (SBA) certified 8(a) and HUBZone company headquartered in Clearwater, FL, with offices in Washington, DC, Atlanta, GA, Abuja, Nigeria, and Yaounde, Cameroon. In 2020, SIS formed Strategic Innovation Solutions Africa, Ltd (SIS Africa) to expand our international work. With over 130 employees, SIS provides management and health-related services to federal, state, and local governments in the areas of project management and logistics, health sciences and research, information technology (IT), and communication and training. SIS projects are staffed with the best and the brightest in the industry who bring innovative and effective solutions to meet our customers’ needs. We deliver high quality, on time, and within budget results that address contract requirements through planning, implementation, and post-implementation support. Diversity, transparency, and inclusion are woven into all of our activities. We have active relationships with Historic Black Colleges and Universities (HBCUs) and other US minority institutions, and secure in-country staff for international projects.

SIS’s contracting approach is based on providing excellent customer service. We understand customer service needs can vary from simple, routine requests to more complex emergency situations. We staff our contracts with individuals who have the capacity to work with diverse groups of people with different levels of expertise and have strong communication and problem-solving skills. To meet our customers’ needs, we recruit a variety of professionals, including administrators, public health and other subject matter experts, researchers, communication specialists, trainers, curriculum developers, evaluation specialists, IT experts, and support personnel. SIS also provides and manages staff assigned to work onsite in Federal agencies.

Project Experience

Technical Capabilities Overview	
Logistics Support	<p>SIS provides logistics support to the CDC’s Division of Emergency Operations (DEO) for its PHEM Fellowship program that trains public health professionals in 22 countries to function as emergency responders and develop emergency management plans for disease outbreaks and emergency response efforts. We also coordinate logistics and training for the 3-month PHEM Fellowship program in Atlanta, GA.</p> <p>For the DEO, SIS provided logistics support in Cameroon for emergency and incident manager training and training of master trainers.</p> <p>SIS supported CDC’s National Center for Environmental Health (NCEH) and provided facilities management and office automation support to internal and external stakeholders. This included inventory and storage management, cataloging, and property utilization related to depot, local, and other supply activities.</p> <p>SIS also supports the USAF’s Warner Robins Air Logistics Center in improving the supportability of USAF aircraft with the application of lean tools and technology, transformation, and other continuous process improvement efforts related to material and supply requirements. This includes performing audits, parts delivery, customer support, and contractor/vendor compliance.</p>
Distribution and Supply Chain Management	<p>SIS supported the DoD, Walter Reed Army Institute of Research (WRAIR) in the purchase, repacking, storage, and delivery of medications to the Kintampo District Hospital in Ghana.</p>
Public Health Research and Evaluation	<p>SIS provides support to the CDC’s National Center for Injury Prevention and Control (NCIPC), Violence Against Children Survey (VACS) with survey design, data collection, computer programming, and technical writing, and materials development in indigenous languages to inform the development of evidence-based strategies in 14 countries, including Mozambique, Lesotho, and Cote D’Ivoire.</p> <p>SIS provided technical assistance (environmental scans, curriculum development and training, and biosafety program design) for the CDC’s Division of Foodborne, Waterborne and Environmental Diseases (DFWED) to improve the prevention and control of FWED diseases nationally and internationally.</p> <p>We also supported a HRSA/I-Tech project to strengthen and improve the quality of nursing and midwifery care throughout Cote D’Ivoire.</p>
Emergency Response and Crisis Management	<p>For the CDC’s Division of Emergency Operations, SIS supports the 3-month Atlanta-based emergency response training at the CDC of global PHEM (Public Health Emergency Management) Fellows who develop emergency management plans for implementation in their home countries.</p> <p>SIS also supported the development of the PHEM curriculum for 22 countries impacted severely by COVID-19, including several countries in Africa. We developed 25 in-person and virtual courses and materials for incident manager training and implemented the training with in-country trainers.</p>
IT and Systems Support	<p>SIS provides support to HRSA/ICAP’s Resilient and Responsive Health Systems Initiative in the DRC with technical assistance to the DRC Nursing Council (NC) to address the severe and chronic shortage of qualified healthcare workers in country. This includes development of a DRC nursing education schools database, training national and provincial NC members on the database and operating systems, redesign of the NC website, facilitating information exchange among other nursing organizations in the region, promoting professional development, and</p>

Technical Capabilities Overview	
Laboratory Support	<p>working with key stakeholders to strengthen the Nursing Now Group.</p> <p>In response to the COVID-19 pandemic, SIS prepared and tested blood and saliva cultures for the CDC's National Center for Immunization and Respiratory Diseases (NCIRD), Viral Vaccine Preventable Diseases Branch (VVPDB), as well as provided surge support and a Quality Management Systems assessment to ensure safety compliance across all CDC laboratories.</p>
